NOAA Weather Radio (NWR) is nationwide and operates 24 hours a day. This brochure pertains to the transmitters operated by the National Weather Service in Charleston WV and the areas they cover.

To receive NWR broadcasts you must use a scanner or weather radio receiver which can be bought at local electronic or retail stores.

- All NWR receivers can receive the broadcasts.
- Some models can be in a standby mode and activate and alarm automatically when specific weather messages are received.
- Programmable weather radio receivers allow you to customize your receiver for the products and counties for which you want the radio to activate and alarm when received. This is done by use of entering SAME (Specific Area Message Encoding) codes.

Some of the most common products that are Alarmed from the weather office are ...

WARNINGS AND SOME WATCHES.

HAZARDS THAT MAY NOT BE WEATHER RELATED... Chemical spills or leaks ... Notification of 911 phone outages

AMBER ALERTS – Child abductions.

HOMELAND SECURITY SITUATIONS
